HR Manager
Capgemini

Dear sir/madam,

My name is Nasrin and I am very excited to apply for the position of Software Developer at Capgemini. I'm a recent graduate (November 2022) B Tech in Information Technology from Institute of Engineering and Technology Calicut University, and I'm eager to enter the workforce. I meet all of the academic requirements mentioned in your job posting.

Growing up, I took a liking to all things programming and website development, which led to me picking Information Technology as my major. Apart from all the tech courses during my B tech studies, I thoroughly enjoyed and excelled at the Fashion Designing and Calligraphy. Being as programmer I eager to learn programming languages like HTML,CSS.

During My academic period I had done many projects related to the software Industry. I had created a website named as Bed Tracking System where the public can track vacant bed details in their nearby hospitals by providing their pin code and district. The website was designed using PHP and MySQL as its back end languages and HTML,CSS & JS as its frond end languages. Also I have been created an application PALLICARE which is an application for palliative authorities and it was designed using Python, MySQL, HTML, CSS & JSS.

I am a good problem solver having the strength to hard work with Quick learning skills. I have participated in Ideathon event and I got third from my college. I am a part of Scount & Guide Organization during my school times and I went upto Rajyapuraskar level.

I look forward to putting my knowledge and skills to use as a productive member of your IT department, and learning from the best in the industry to be very innovative & flexible.

Sincerely,

Nasri N
